Project planning report

Saved project inputs and selected calculation results

2026-10-27 11:21:47.877630+00:00

Project

This report presents saved project inputs and the original results of the selected calculations. Country-specific requirements, electrical design and installation checks remain open. It does not approve the complete installation.

Project	Certificate information · owned synthetic project
Project reference	2e8444927ed541308da3822a34cd2b43
Input revision	3

Site and project inputs

Location	
Country	DE
Time zone	—
Project note	Owned synthetic acceptance project for certificate source information only. No site survey, energy result or installation approval.

Equipment checks

Country requirements are not assessed by the selected calculations.

Assessment status	Further checks required

Converter output

Assessment status	Checked requirements met
Result	75 kW
Source document · Page 2	75 kW https://de-linker.com/wp-content/uploads/2026/09/GW_ET-75-100kW_Datasheet-EN-20260708-V2.1.pdf

Grid phases

Assessment status	Checked requirements met
Result	3
Requirement	3

Equipment checks

Assessment status	Further checks required

Provisional bill of materials

This list combines the selected equipment, saved roof modules and documented included components. Quantities are shown where established. Mounting, cabling, protection and other installation materials still require project-specific design.

Quantity	Product	Reference	Supply scope
1 pc	GoodWe GW75K-ET-G10	DLK-GOODWE-GW75KETG10	Selected equipment

Saved calculation references

Calculation reference	4e092bd22d1c468c8f7333ad72b0dcb7 · Input revision 3

Certificates and related product documents

These documents were linked to the selected products when this result was recorded. Their applicability to this project’s models, firmware, configuration, standard editions and annexes has not been assessed here. Compliance with country-specific requirements, installation approval and grid-operator acceptance require separate evidence.

The following information was read from labelled fields on the first page of the retained source document. It does not establish that the equipment or project meets the stated conditions. Other pages, reports and referenced annexes require separate assessment.
