Project planning report

Saved project inputs and selected calculation results

2026-10-26 00:00:02.541574+00:00

Project

This report presents saved project inputs and the original results of the selected calculations. Country-specific requirements, electrical design and installation checks remain open. It does not approve the complete installation.

Project	Installation · synthetic route example
Project reference	9a84917ca0094a5d8898f34e63a0154e
Input revision	3

Site and project inputs

Location	Berlin · Beispielstandort
Country	DE
Time zone	Europe/Berlin
Project note	Synthetic route-length example only. Product identities use current WooCommerce data; positions and allowances are illustrative.

Physical devices and site connections

Connection point names and positions are project inputs. They do not establish manufacturer terminal ratings or approve the circuit design.

Device or site connection	Product	Connection points
Example inverter A	SAJ H2-10K-T3	Example connection point
Example inverter B	SAJ H2-10K-T3	Example connection point

Installation routing

Each listed cable or conductor is one physical run. Lengths use the saved three-dimensional path and explicitly declared extra length. Cable sizing, connector matching, protection, earthing, mounting and country requirements have not been assessed by this route calculation.

Source document · survey	Owned synthetic 3D route example: 5 m horizontal + 4 m vertical + 5 m horizontal; not a site survey.

Product	Circuit / route	Quantity	Route length + extra length
Example multicore cable	Illustrative connection for length takeoff / Recorded 3D route	16.5 m	14 m + 2.5 m · Explicit synthetic 2.5 m allowance; not a recommendation
Example independent conductor A	Illustrative connection for length takeoff / Recorded 3D route	16.5 m	14 m + 2.5 m · Explicit synthetic 2.5 m allowance; not a recommendation
Example independent conductor B	Illustrative connection for length takeoff / Recorded 3D route	16.5 m	14 m + 2.5 m · Explicit synthetic 2.5 m allowance; not a recommendation

Provisional bill of materials

Each listed cable or conductor is one physical run. Lengths use the saved three-dimensional path and explicitly declared extra length. Cable sizing, connector matching, protection, earthing, mounting and country requirements have not been assessed by this route calculation.

Quantity	Product	Reference	Supply scope
16.5 m	Example multicore cable		Installation requirement · specification pending
16.5 m	Example independent conductor A		Installation requirement · specification pending
16.5 m	Example independent conductor B		Installation requirement · specification pending
