# Project planning report

Saved project inputs and selected calculation results

2026-10-27 15:32:12.970252+00:00

## Project

This report presents saved project inputs and the original results of the selected calculations. Country-specific requirements, electrical design and installation checks remain open. It does not approve the complete installation.

| | |
|---|---|
| Project | Certificate information · owned synthetic project |
| Project reference | 2e8444927ed541308da3822a34cd2b43 |
| Input revision | 4 |

## Site and project inputs

| | |
|---|---|
| Location | |
| Country | DE |
| Time zone | — |
| Project note | Owned synthetic acceptance project for certificate source information only. No site survey, energy result or installation approval. |

## Equipment checks

Country requirements are not assessed by the selected calculations.

| | |
|---|---|
| Assessment status | Further checks required |

## Converter output

| | |
|---|---|
| Assessment status | Checked requirements met |
| Result | 75 kW |
| Source document · Page 2 | 75 kW<br>https://de-linker.com/wp-content/uploads/2026/09/GW_ET-75-100kW_Datasheet-EN-20260708-V2.1.pdf |

## Grid phases

| | |
|---|---|
| Assessment status | Checked requirements met |
| Result | 3 |
| Requirement | 3 |

## Equipment checks

| | |
|---|---|
| Assessment status | Further checks required |

## Provisional bill of materials

This list combines the selected equipment, saved roof modules and documented included components. Quantities are shown where established. Mounting, cabling, protection and other installation materials still require project-specific design.

| Quantity | Product | Reference | Supply scope |
|---|---|---|---|
| 1 pc | GoodWe GW75K-ET-G10 | DLK-GOODWE-GW75KETG10 | Selected equipment |

## Saved calculation references

| | |
|---|---|
| Calculation reference | 0ee6c2d603d1419a915a4219c32156d5 · Input revision 4 |

## Certificates and related product documents

These documents were linked to the selected products when this result was recorded. Their applicability to this project’s models, firmware, configuration, standard editions and annexes has not been assessed here. Compliance with country-specific requirements, installation approval and grid-operator acceptance require separate evidence.

The following information was read from labelled fields on the first page of the retained source document. It does not establish that the equipment or project meets the stated conditions. Other pages, reports and referenced annexes require separate assessment.

## Project device details

The model and device firmware/software values below were entered for this project. Each comparison refers only to the first page of the named document. A matching field does not establish that the device or installation meets all document conditions.

These device details and comparisons belong to the source calculation and input revision shown here.
